	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2841

DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Omum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 20- 38 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1-19 of U.S. Patent No. 6650548. Although the conflicting claims are not identical, they are not patentably distinct from each other.

With respect to claim 20 and 31, claims 1 and 11 respectively, of Patent 6650548 teaches all of the limitations exactly except: claim 20 discloses "each row being offset or staggered..." and claim 1 of Patent 6650548 teaches only that "each row being offset..." however this limitation in claim 1 of patent 6650548 still reads on claim 20.

Claims 21 – 30 corresponds to claims 2 – 11 of patent 6650548.

Claims 32 – 36 corresponds to claims 13 – 17 of patent 6650548.

With respect to claim 37, claim 18 of patent 6650548 teaches all of the limitations exactly except: claim 37 discloses an insulating plate "having opposite plate surfaces" and claim 18 of 6650548 teaches only an insulating plate but the top and bottom of the insulating plate would be two opposite plate surfaces therefore claim 18 of patent 6650548 reads on claims 37. Claim 37 also discloses, "connecting at least three connector clips in the plate to the three holes or connecting at least three connection locations together" and claim 18 of patent 6650548 teaches "groups of at least three connector clips in the plate connected in ...", though it doesn't teach "connecting" it is understood since it does teach "connected" therefore claim 18 reads on claim 37.

With respect to claim 38, claim 19 of patent 6650548 teaches all of the limitations exactly except: Claim 38 discloses an insulating plate "having opposite plate surfaces" and claim 19 of patent 6650548 teaches only an insulating plate but the top and bottom of the insulating plate would be two opposite plate surfaces therefore claim 19 of patent 6650548 reads on claims 37. Claim 38 also discloses "connections locations", claim 19 of patent 6650548 teaches "holes" which serves the purpose of connection locations therefore claim 19 of patent 6650548 reads on claim 38.

With respect to claim 39, claims 1-19 of patent 6650548 read on all the limitations of claim 39. The conductive strips on the insulating plate and in electrical contact with certain groups of holes are circuit patterns and they can be used to interface with other conductive strips (circuitry) in electrical contact with other groups.

Art Unit: 2841

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent 4606725 teaches a breadboard with detachable elements.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ivan H. Carpio whose telephone number is 571-272-8396. The examiner can normally be reached on M-R 6:00am - 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kammie Cuneo can be reached on 571-272-1957. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
